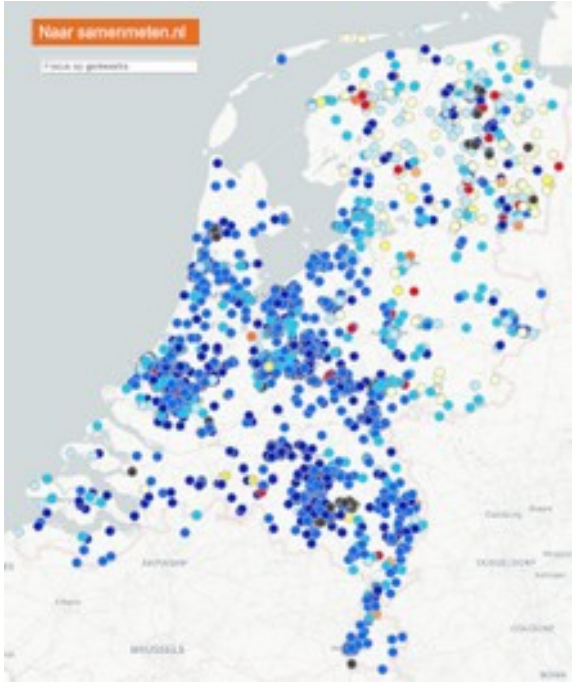
# Overzicht meetlocaties in enkele gemeentes - Samen Meten dataportaal -

## meetlocaties met metingen en gebruikte sensoren 2019-2025

- Voor een aantal gemeentes worden de low-cost meetstations van enkele gemeentes aangegeven operationeel per jaar van 2019 t/m 2025.
- Meetstations, operationeel gehouden door diverse projecten en burger initiatieven, gebruiken diverse fijnstof sensoren. Alleen PM2.5 metingen zijn meegenomen in dit onderzoek.
- De informatie is vergaard via Samen Meten Dataportaal API (april 2026).
- De om de interactieve kaartjes te downloaden als HTML bestand kan geclickt worden op de kaartjes bij elk overzicht. Het HTML bestand kan dan vervolgens via de browser ingezien worden.
- De logo's en vlaggetjes van enkele regio's zijn puur bedoeld als indicatie van een gemeente of regio.
- De analyse van het getoonde (spreadsheet) cijfermateriaal wordt overgelaten aan de lezer.
- Dit overview is gebaseerd op een spreadsheet zie https://github.com/teusH/MySense/SamenMetenTools



Teus Hagen, april 2026, MySense project.
